Slovenskočeský NLP workshop (SloNLP 2016)

SloNLP is a workshop focused on Natural Language Processing (NLP) and Computational Linguistics. Its primary aim is to promote cooperation among NLP researchers in Slovakia and Czech Republic.

The topics of the workshop include automatic speech recognition, automatic natural language analysis and generation (morphology, syntax, semantics, etc.), dialogue systems, machine translation, information retrieval, practical applications of NLP technologies, and other topics of computational linguistics.

In the second year of the workshop, 11 submissions were received and 8 of them accepted. Authors of two rejected papers chose to present an abstract of their work.
