

Preface

The second version of this Spring School on Networks (SSN) presented a set of keynotes and lectures given by top researchers and practitioners, an academic conference, and a poster session. The talks were made in Spanish and Portuguese, articles were wrote in same languages but they also included an abstract in English.

The School was held in the Faculty of Engineering, Universidad de Chile, in November 21-22, 2016 and it covered various subjects related to Internet Resilience, such as design of robust and resilient networks, network monitoring, systems analysis tools (online and offline), including visualization and machine learning algorithms applied to the analysis of distributed systems.

Travel and attendance grants were courtesy of ACM SIGCOMM and Internet Society.

Program Committee

- Guefry Agredo Mendez, Universidad del Cauca, Colombia
- Cesar Azurdia, Universidad de Chile
- Marcelo Bagnulo, Universidad Carlos III de Madrid, Spain
- Javier Bustos-Jimenez (chair), NICLabs, DCC, Universidad de Chile
- Alvaro Cardenas, University of Texas at Dallas, USA
- Pedro Casas, Austrian Institute of Technology
- Ignacio Castro, Queen Mary University of London, UK
- Sandra Cespedes (chair), DIE Universidad de Chile
- Eduardo Cuervo, Microsoft Research, USA
- Alejandro Hevia (chair), DCC. Universidad de Chile
- Nicolas Hidalgo, Universidad de Santiago, Chile
- Felipe Lalanne, INRIA Chile
- Carlos Lozano, IEEE ComSoc Director Latin America
- Hugo Meric, CNES, France
- Andres Navarro, Universidad Icesi, Colombia
- Jorge Ortiz, IBM Research, USA
- Alvaro Pachon, Universidad Icesi, Colombia
- Victor Ramiro, ISAE-SUPAERO, France
- Patricio Reyes, ITMATI-Repsol, Spain
- Diego Rivera, Telecom Sud Paris, France

- Erika Rosas, Universidad de Santiago, Chile
- Elisa Schaeffer, FIME, UANL, Mexico
- Justine Sherry, Carnegie Mellon University, USA
- Alonso Silva, NOKIA Bell Labs, France
- Narseo Vallina, International Computer Science Institute (ICSI), USA
