

Workshop Notes

11th International Workshop
“What can FCA do for Artificial Intelligence?”
FCA4AI 2023

32nd International Joint Conference on Artificial Intelligence
IJCAI 2023

August 20 2023

Macao, S.A.R. China

Editors

Sergei O. Kuznetsov (HSE University Moscow)

Amedeo Napoli (LORIA Nancy)

Sebastian Rudolph (TU Dresden)

IJCAI/2023 MACAO

Preface

The ten preceding editions of the FCA4AI Workshop (see <http://www.fca4ai.hse.ru/>) showed that many researchers working in Artificial Intelligence are deeply interested by a well-founded method for classification and data mining such as Formal Concept Analysis (see <https://upriss.github.io/fca/fca.html>).

The FCA4AI Workshop Series started with ECAI 2012 (Montpellier) and the last edition was co-located with IJCAI-ECAI 2022 (Vienna, Austria). The FCA4AI workshop has now a long history and all proceedings are available as CEUR proceedings (see <http://ceur-ws.org/>, volumes 939, 1058, 1257, 1430, 1703, 2149, 2529, 2729, 2972, and 3233). This year, the workshop has again attracted researchers from different countries working on actual and important topics related to FCA, showing the diversity and the richness of the relations between FCA and AI.

Formal Concept Analysis (FCA) is a mathematically well-founded theory aimed at data analysis and classification. FCA allows one to build a concept lattice and a system of dependencies, i.e., implications and association rules, which can be used for many AI needs, e.g. knowledge discovery, machine learning, knowledge representation and reasoning, natural language and text processing. Recent years have been witnessing increased scientific activity around FCA. In particular an important line of work is aimed at extending the possibilities of FCA w.r.t. data and knowledge processing, and dealing with complex data. These extensions open new directions for AI practitioners. Accordingly, the workshop will investigate the following issues:

- How can FCA support AI activities such as knowledge discovery, knowledge representation and reasoning, machine learning, natural language processing, information retrieval...
- How can FCA be extended for helping AI researchers to solve new and complex problems, in particular how to combine FCA and neural classifiers for allowing interpretability and producing valuable explanations...

First of all we would like to thank all the authors for their contributions and all the PC members for their reviews and their precious collaboration. The papers submitted to the workshop were carefully peer-reviewed by three members of the program committee. The order of the papers in the proceedings (see table of contents in page 5) follows the program of the workshop (see <http://fca4ai.hse.ru/2023/>).

The Workshop Chairs

Sergei O. Kuznetsov

National Research University Higher School of Economics, Moscow, Russia

Amedeo Napoli

Université de Lorraine, CNRS, Inria, LORIA, 54000 Nancy, France

Sebastian Rudolph

Technische Universität Dresden, Germany

Program Committee

Jaume Baixeries (UPC Barcelona, Catalunya)
Alexandre Bazin (LIRMM, Université de Montpellier, France)
Karell Bertet (L3I, Université de La Rochelle, France)
Miguel Couceiro (LORIA, Université de Lorraine, Nancy France)
Diana Cristea (Babes-Bolyai University, Cluj-Napoca, Romania)
Florent Domenach (Akita International University, Japan)
Marianne Huchard (LIRMM, Université de Montpellier, France)
Dmitry I. Ignatov (HSE University Moscow, Russia)
Mehdi Kaytoue (Infologic, Lyon, France)
Francesco Kriegel (Technische Universität Dresden, Germany)
Leonard Kwuida (Bern University of Applied Sciences, Switzerland)
Florence Le Ber (ENGEES/Université de Strasbourg, France)
Nida Meddouri (EPITA, Kremlin-Bicêtre, Paris, France)
Nizar Messai (Université François Rabelais Tours, France)
Rokia Missaoui (UQO University Ottawa, Canada)
Sergei A. Obiedkov (NRU Higher School of Economics, Moscow, Russia)
Manuel Ojeda Aciego (Dept. of Applied Mathematics, University of Malaga, Spain)
Jean-Marc Petit (Université de Lyon, INSA Lyon, France)
Uta Priss (Ostfalia University, Wolfenbüttel, Germany)
Christian Sacarea (Babes-Bolyai University, Cluj-Napoca, Romania)
Francisco José Valverde Albacete (Universidad Carlos III de Madrid, Spain)
Renato Vimieiro (Universidade Federal de Minas Gerais, Belo Horizonte, Brazil)

Contents

| | | |
|---|--|----|
| 1 | <i>Knowledge Base pattern structures-based Classification of underground forums: A case study</i> Abdulrahim Ghazal | 7 |
| 2 | <i>Interval pattern structures for interpreting K-nearest neighbor approach in lazy classification</i> Alan Tomat | 17 |
| 3 | <i>Using Multimodal Clustering on Formal Contexts in Event Extraction with Neural Nets</i> Mikhail Bogatyrev, Dmitry Orlov, and Ilya Zapyantsev | 25 |
| 4 | <i>Full polynomial probabilistic FCA-based knowledge extraction</i> Dmitry V. Vinogradov | 35 |
| 5 | <i>A Note on Counting Basic Choice Functions with Formal Concept Analysis</i> Dmitry I. Ignatov | 47 |
| 6 | <i>Dependency Covers from an FCA Perspective</i> Jaume Baixeries, Victor Codocedo, Mehdi Kaytoue, and Amedeo Napoli | 57 |
| 7 | <i>Constructing decision quivers</i> Egor Dudyrev, Sergei O. Kuznetsov, and Amedeo Napoli | 69 |
